Mobile Application and Django Back-End developer with a problem solving skill focus towards the development of applications, utilizing enterprise level languages to deliver solutions with a customer first approach.

LANGUAGES		FRAMEWORKS		TOOLS	
• Java	• JavaScript	• Android	• HTML	• Git	• Intellij
• Kotlin	• Python	• Flutter	• CSS	• VSCode	• Figma
• Dart		• Django		• GitHub	• Firebase

WORK EXPERIENCE

Worked on E-commerce Application (Contract Based)   **Jan 2023 - July 2023 (6 months)**

- Used Flutter and google material design tools to build and maintain a user friendly e-commerce application
- Updated the application user authentication and validation using firebase authentication to enable the user to log -in in one click or with their social networks
- Implemented google map API and VISA payments Authorization API to enable the user to easily locate the position of nearby shops and make payment with ease

Code Instructor at Tech Enthusiast (Online)   **June 2022 - Dec 2022 (7 months)**

- Implemented OBS studio and Microsoft whiteboard to organize coding tutorial videos for students
- Thought basic of JAVA,HTML and CSS to students, and organized basic coding challenges for them to measure their knowledge on what they have learnt so far.
- Operated a youtube channel where I uploaded 5 videos about basic programming and solved basic coding challenges here is the link : http://youtube.com/@codeWithAbdulwahab.

ACHIEVEMENT

Participating in leetcode and Hackerrank coding challenges

- The purpose of these challenges is to determine developers who can come up with an accurate solutions with linear time and space complexity of a particular problem.
- Privileged to solve over 30 easy and medium question using Java, which eventually helped me in my problem solving approaches , though still trying hard to solve difficult questions.
- Participating in this challenges assists me in evaluating myself because the challenges are for those who have strong coding back ground. here is the link to my profile on leetcode: https://leetcode.com/Abduwahab03/

PROJECTS

Daily News App (flutter)

- Used news API and flutter framework to build a user friendly news application that enables user to view and read daily news
- News data was fetched from the API with the help of HTTP package, and the data was converted to Dart readable language with the help of JSON object format. view the project repo here: **DailyNews**

InfoBlog (Django)

- A dynamic django blog application where user can write and recommend posts for others to read via e-mail, tagging others is also possible in the project, the poject was built basically with django,css and html. view the repo : **InfoBlog**

EDUCATION

Ahmadu Bello University, Zaria Nigeria   **September 2015 - November 2021**

- Bachelor of Engineering, Mechanical Engineering

Online Courses (Coursera and IBM)   **June 2023 - August 2023**

- Introduction to DevOp and cloud computing, each has earned certificate.
